

Apache Commons Pool Issue tracking

Apache Commons Pool uses [ASF JIRA](#) for tracking [issues](#). See the [Apache Commons Pool JIRA project page](#).

To [use JIRA](#) you may need to [create an account](#) (if you have previously created/updated Commons issues using Bugzilla an account will have been automatically created and you can use the [Forgot Password](#) page to get a new password).

If you would like to [report a bug](#), or [raise an enhancement request](#) with Apache Commons Pool [please do the following](#):

1. [Search existing open bugs](#). If you find your [issue](#) listed then please add a comment with your details.
2. [Search the mailing list archive\(s\)](#). You may find your [issue or idea](#) has already been discussed.
3. [Decide if your issue is a bug](#) or an enhancement.
4. Submit either a [bug report](#) or [enhancement request](#).

Please also [remember these points](#):

- [the more information you provide, the better we can help you](#) 你提供的信息越多，越能帮助你
- [test cases are vital](#), particularly for any proposed enhancements 测试用例是至关重要的
- [the developers of Apache Commons Pool are all unpaid volunteers](#) 开发者都是无偿志愿者

For more information on [subversion](#) and creating [patches](#) see the [Apache Contributors Guide](#).

You may also [find these links useful](#):
