

Overview

Apache Commons Pool shares mailing lists with all the other Commons Components. To make it easier for people to only read messages related to components they are interested in, the convention in Commons is to prefix the subject line of messages with the component's name, for example:

- [pool] Problem with the ...
使用相关的问题
- Questions related to the usage of Apache Commons Pool should be posted to the User List. The Developer List is for questions and discussion related to the development of Apache Commons Pool. Please do not cross-post; developers are also subscribed to the user list. You must be subscribed to post to the mailing lists. Follow the Subscribe links below to subscribe.

Note: please don't send patches or attachments to any of the mailing lists. Patches are best handled via the Issue Tracking system. Otherwise, please upload the file to a public server and include the URL in the mail.

Apache Commons Pool Mailing Lists

Please prefix the subject line of any messages for Apache Commons Pool with [pool] - thanks!
